In [1]:
```python
print("This line of code is before both IF-ELSE functions")
```

This line of code is before both IF-ELSE functions

In [2]:
```python
countervariable = 125

if (countervariable < 100):
    print("Counter is smaller than 100")
    print("This line is in the first if section")
else:
    print("Counter is greater than 100")
    print("This line is in the first else section")
```

Counter is greater than 100
This line is in the first else section

In [3]:
```python
number = 3
if (number > 0):
    print("Number is a positive number")
    print("This line is in the second if section")
else:
    print("Number is a negative number")
    print("This line is in the second else section")
```

Number is a positive number
This line is in the second if section

In [4]:
```python
print("This line of code is after both of the IF-ELSE functions")
```

This line of code is after both of the IF-ELSE functions
